### Keywords

Era of Society 5.0;  
Guidance and  
Counseling; and Islamic  
Counseling

### Abstract

In the era of society 5.0, there was a digital transformation so that artificial intelligence, internet of things, and block chain were born. In addition, in the era of society 5.0, the economy has a close relationship with social conditions, vitality, high quality of life expectancy, including the relationship between the virtual world and the real world. Seeing these conditions, the era of society 5.0 has implications for various professions, one of which is guidance and counseling. The implications of the guidance and counseling profession include counselor characteristics and career flexibility. The era of society 5.0 also changed the perspective of guidance and counseling services to be cyber-based, so that a need assessment and program design was needed based on Islamic values, so that individuals could develop in the era of society 5.0.

The current industrial development has led to the era of society 5.0 after going through the era of the industrial revolution 1.0 to the era of the industrial revolution 4.0. This can be seen in **Figure 1**. The phenomenon in the era of society 5.0 has also changed various industries such as the computer industry so that digital transformation occurs in the form of artificial intelligence, internet of things, and block chain.

**Figure 1. Development of the Industrial Revolution Era Towards the Era of Society 5.0**

In the era of society 5.0, the economy has a close relationship with social conditions, vitality, high quality of life expectancy, including the relationship between the virtual world and the real world. In addition, various problems that occur in the era of society 5.0 can be solved through various skills such as: problem solving skills, critical thinking, creativity, self-management, coordination with others, emotional intelligence, decision-making abilities, negotiation, service orientation, and cognitive flexibility.

Conditions in the era of society 5.0 certainly have implications for various sectors, one of which is the guidance and counseling profession. The implications of the guidance and counseling profession include counselor characteristics and career flexibility. The implications of the era of society 5.0 on guidance and counseling in more detail are presented in **Figure 2**.

**Figure 2. Implications of Era Society 5.0 on Guidance and Counseling**

Based on **Figure 2**, it can be understood that the era of society 5.0 made changes in counseling services to be cyber-based. Based on the type of guidance and counseling services, basic services can be provided through consultation, responsive services as a continuation of the advocacy function, individual planning services through media-based individual counseling, and also evaluation of services using databases. Therefore, it takes a need assessment and program design based on Islamic values, so that individuals can develop in the era of society 5.0.
